This document is suited for the developers that would be working on this project, so that they could have a clear sight on what could occur and be able to plan ahead.

Revision Control

History Revision:

<i>Revision Date</i>	<i>Person Responsible</i>	<i>Version Number</i>	<i>Modification</i>
10/09/17	Carlos Adrian A. Daroya	1.0	Initial document
10/11/17	Pauline Ocampo	1.1	Fixed unique file reference

Use-Case Name: 6.0. Change User's Generated Report

Description: The librarian has a functionality to edit or change the generated report. There can be systematic errors or even mechanical errors by the students when tapping the ID. This functionality is present to override such problems.

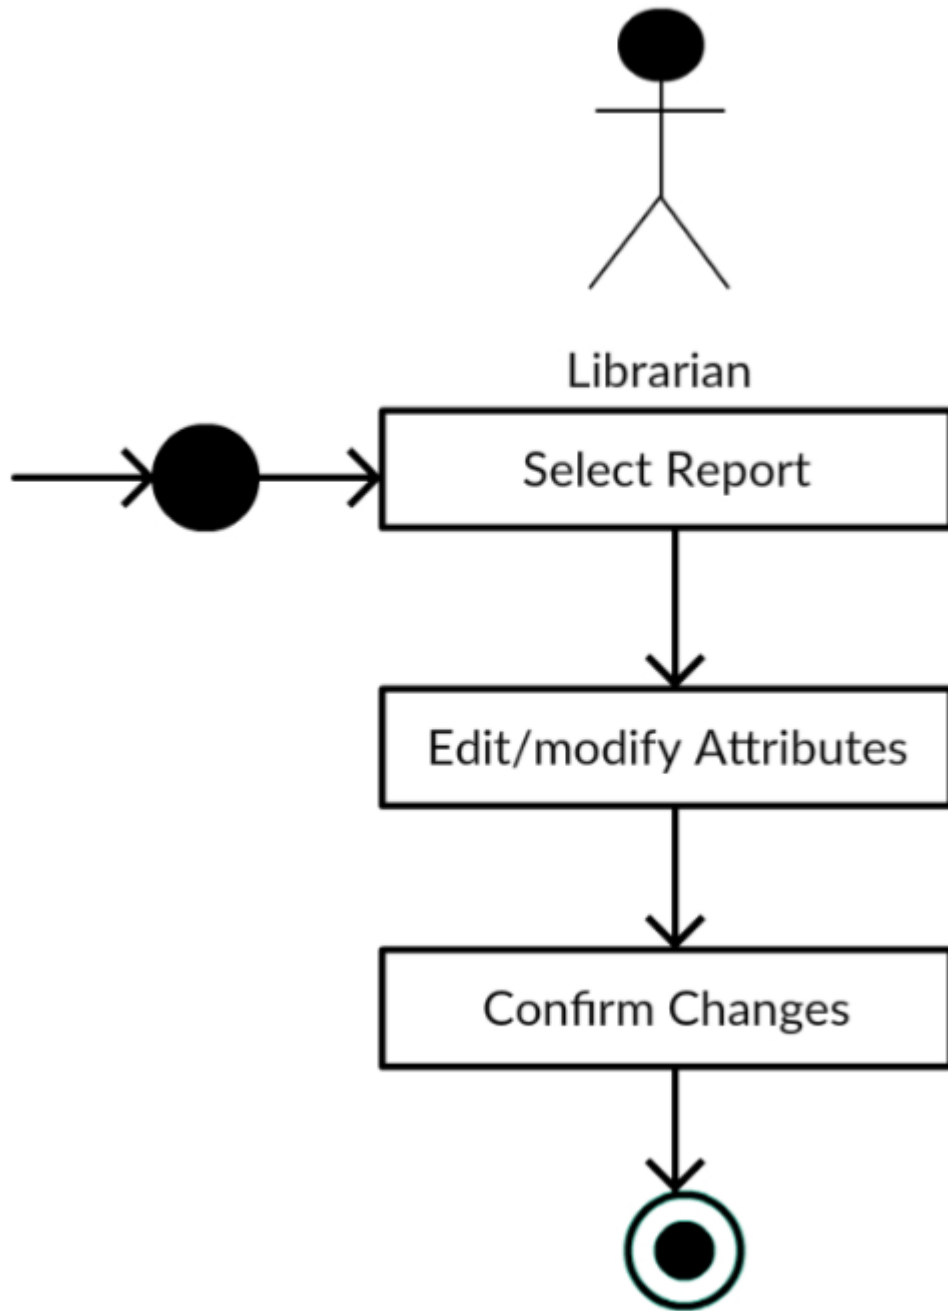

Preconditions: For this functionality to trigger, the following must have already occurred:

- Existing usage report

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Usage cost is calculated and verified as valid	1. Select from Records of Generated Reports 2. Edit/Modify attributes 3. Confirm Changes (changes reflect in database)

Activity Diagram of the Flow of Events:

Postcondition: Changes with generated reports reflect in the database

Relationships: NONE

Special Requirements: NONE
